*Threesome*

*for your every  
writing need!*

LITHO IN U.S.A.

1-49 L43

**IMPORTANT  
INSTRUCTIONS**

*ON*

**SHEAFFER'S  
WRITING INSTRUMENTS**

# The Right Way to Fill your Sheaffer Pen with the One-Stroke *Touch Down Filler*

## **UNSCREW CAP—**

at top of barrel (in case of desk pens unscrew quill) and hold point within wide mouth of *Skrip* bottle. Pull plunger out full distance.

## **IMMERSE—**

*entire point in Skrip*  
Count ten after down-stroke of cap permitting pneumatic action to fill.

---

**NOTE:** Changing weather conditions may cause water to appear in droplets on the point. Do not confuse this condensation with leakage; simply wipe it off!

## **THE PEN FILLS—** *at the completion of the down stroke*

After allowing point to remain in *Skrip* for count of ten, tighten plunger cap or quill and drain surplus fluid with a blotter or absorbent cloth with point held up.

## **OCCASIONALLY—**

it is desirable to flush pen in water by pumping plunger several times and emptying completely.

---

**IMPORTANT** Do not attempt to repair or transfer gold points and assemblies. Always send your pen to your Sheaffer dealer for repairs.

## to Fill your *Lever type pen*

Immerse the gold point in SKRIP; open and close the lever; for flushing purposes open and close lever several times; allow point to remain in SKRIP for ten seconds after closing lever for last time; remove and wipe point clean with cloth or tissue.

## to Reload your *Fineline pencil*

Turn the top of pencil to right until small metal push rod projects slightly; then turn all the way back to left; insert lead as far as it will go and press its point gently against any hard surface to engage clutching mechanism.

# To Replace Your *Stratowriter*

## UNIT Retractable Model

Unscrew the two-part barrel while writing tip is retracted. Grasp the upper part of the barrel above the clip so as not to bend the clip—remove writing unit and replace with a new writing unit.

## CAP MODEL

Unscrew barrel from complete writing unit just above the metal thread ring. Then unscrew writing unit from writing section.

# For Best Results with Your *Stratowriter*

## KEEP TIP DRY

Treat the Stratowriter as you would a conventional fountain pen—it is not a pencil . . . a slight accumulation of ink may appear at the ball point. Wipe it off occasionally.

If, by any chance, you do get stains on your fingers, remove with alcohol, as alcohol is a solvent for Strato-Ink.

## GUARANTEE ON SHEAFFER'S WRITING INSTRUMENTS

All Sheaffer writing instruments are made of fine materials by fine craftsmen. Sheaffer guarantees to replace originally defective parts without charge. If your pen, pencil or Stratowriter needs attention, deliver it to the authorized Sheaffer repair station or to a Sheaffer dealer for repairs.
